A GROUNDING PRESENCE – IN ANY AND EVERY ROOM...

A worksurface has the capability to utterly transform the look and feel of your room. With such a vast collection of textures, materials, and colours at your disposal; our worksurface collection is home to a plethora of looks to suit you and your home, no matter your kitchen style.

With our extensive range, choosing a worksurface is no longer a simple choice of, which colour do you like? Discover what role you would like your worksurface to play within your design: a striking focal point that immediately captures attention, or a supporting element that complements and allows other interior pieces to shine.

Dive into the world of colour; dare to go bold or opt for something soft and subtle. Explore textures and patterns to unlock your creativity or consider our delicate veining materials for a more refined look. The design possibilities are endless.

This brochure is lavish in inspiration and ideas to consider before you make your choice. Showcased in carefully curated collections, from Neutral to Black, peruse through our worksurface range complete with the very best materials from around the world.

SEE AN ICON AND NEED A RECAP OF WHAT IT STANDS FOR? JUST FLIP TO OUR BACK PAGE FOR A BREAKDOWN AND USE IT AS YOUR BOOKMARK TO MAKE BROWSING EASY.

Note that all of the images you'll see in our bespoke collection are a representation of the real thing. You can expect variations in tone, texture and pattern but that's all part of your worksurface's individuality.

WHITE

COLLECTION

Pure and simple

A timeless option for any kitchen design, be it classic or contemporary, a crisp white worksurface instantly brightens a room setting. Evoking images of cool mountain tops, or freshly laid snow, the colour white connotes a sense of calmness and pours this into the room's design palette. Ultimately, creating a welcoming, light space to relax and enjoy.

NEUTRAL

COLLECTION

Nature’s canvas

A palette of sophisticated taupe, putty and biscuit-like beiges, these tactile surfaces are a reflection of nature’s most grounding shades. Curated to mirror a selection of minerals and stones, from textured clay to ribboned marble, in situ they promise a warm, calming presence and make fine company for flagstones and timber floorboards.

BLACK

COLLECTION

Be bold with black

The Black Collection hosts a diverse collective of shades, some subtle and brooding with deep hues, others striking with eclectic tones of copper and amber running through. Delicate patterns like veining and speckled details bring a soft-natured element and diverge from the designs that make a bold statement. Due to its versatility, black worksurfaces hold a place across a breadth of looks; from monochrome to industrial, even trending interiors such as Japandi.

BLACK PURE COLLECTION

Premium Black

PURE BLACK

Pure black worksurfaces omit pattern and detail for a simplistic, sleek style that effortlessly blends to an interior, whether that be classic or modern. Its stripped-back aesthetic creates the perfect canvas to not only bring depth but also set the tone for the encompassing room. Apply reeded textures, as shown, for a bold monochromatic look, or pair with a softer colour palette for an equally desirable design.

INDUSTRIAL

COLLECTION

The new industrial

This collection reflects the transformation of the industrial aesthetic within the interiors world; incorporating luxe metallics and warmer tones for a softer edge to the typically masculine-structured style. With such a diverse and meticulously curated range, your worksurface can be a key focal point in your design with a striking and bold look. Or you can select a more subtle and understated material to elevate the natural architectural elements within the room.

TIMBER

COLLECTION

Natural and tactile

In recent years, there has been an increasingly popular desire to bring elements of nature into interior design. Embracing connections to the world, and a sense of bringing the beauty of outside in; opting for a wooden style worksurface is no longer associated with solely a country home aesthetic. Across a variety of tones and woodgrains, this Timber collection embodies the ideas of biophilic design, and enhances a warm and welcoming feel to any space.

YOUR

WORKSURFACE

Elements and style

Colour palette is just one element behind the worksurface that's right for you. Finding your perfect match means being confident you've chosen the best material for your lifestyle; considering its thickness and profiling; deciding on a sink style and whether to opt for drainer grooves; and picking a finish that appeals to you most. These are the nuances, the markers of personalisation and individuality to truly make a worksurface your own.

MATERIAL CHARACTERISTICS

QUARTZ

More consistent than granite and lower maintenance than marble, quartz is known for its durability, its resistance to chemicals and its ease to live with. It performs extremely well in busy kitchens thanks to its stain-resistance but comes in such an array of colours and finishes that it can appear delicate enough to even suit a bedroom's dressing area.

ULTRA COMPACT

There's something so tactile about this worksurface material that makes it incredibly satisfying to touch. But as soft and sophisticated as it is to look at, Ultra Compact is a material that's as tough as they come. Scratch and stain resistant, tolerant of high temperatures, and uniform in finish, it satisfies both function and form.

GRANITE

Formed from natural rock, granite is one of the most renowned worksurface materials. Iconic for its dappled appearance, every cut of granite is unique, meaning no surface pattern is ever an exact replica. Immensely strong and durable, it's a failsafe option for those favouring natural stone.

NEW ULTRA HD QUARTZ

Ultra HD Quartz combines printed technological innovation with a focus on achieving a visually stunning and authentic natural stone appearance on a quartz body. Suitable for applications in various settings, such as worksurfaces, splashbacks and downstands where both durability and aesthetics are important.

TIMBER

Once the mainstay of the quintessential country kitchen, wooden worksurfaces are now welcomed into city pads as much as those in the provinces. Natural and renewable with a look full of richness and warmth, ours come in a choice of two hardwoods – oak, walnut or iroko – and will only grow in character with use and time.

silestone

Silestone by Cosentino - Is the leading global hybrid surface, a formation of raw materials such as minerals and natural quartz. An environmental success story is the recent addition of the new Hybriq and Hybriq + technology, using 99% recycled water, 100% renewable electric energy as well as recycled materials. This is the worlds first zero carbon mineral surface.

SC STRATA CERAMIC

An engineered ceramic slab designed to mimic the intricate texture and authentic look of natural stone. It combines durability with a finely crafted surface featuring realistic veining, varied tones, and lifelike depth, making it an ideal choice for high-end architectural and interior applications.

THE WORLD'S FIRST

ZERO CARBON

WORKSURFACES

FEATURING

HYBRIQ+

TECHNOLOGY®

Uncompromisingly strong and beautifully sleek, these surfaces blend recycled materials with quartz combining them using 99% recycled water and pure electric energy from renewable sources. It's craftsmanship with a conscience.

Look out for the Q+ symbol amongst the Silestone swatches

20%	Minimum Recycled Glass
98%	Recycled Water
100%	Renewable Energy

MATERIAL FINISH

LEATHER FINISH

Matte and buttery soft, akin to natural leather, though it will vary slightly depending onto which worksurface material it's applied.

RAW FINISH

A natural look with a rough, textured feel, this is a finish that convincingly replicates stone and industrial surfaces like poured concrete.

SMOOTH/SILK FINISH

Available on our Ultra Compact materials. This finish is a happy middle ground between matte and highly polished.

POLISHED FINISH

As the name suggests, this finish is all about high shine. It will also intensify the colour and clarity of your worksurface.

CONCRETE EFFECT FINISH

Designed to replicate the appearance and texture of natural concrete, adding an industrial touch to your worksurface.

SUEDE FINISH

Another matte option but with a softer, more velvety texture, this finish also offers a high-quality consistent colour.

VOLCANO FINISH

Think of lava's rustic appearance and touch, and imagine that on your worksurface. A smooth surface with subtle undulations.

CARESS FINISH

In a textured worksurface that isn't one smooth level, Caress accentuates and celebrates those rises and falls, adding final polish to its high points.

TEXTURED FINISH

An etched, patterned finish that adds depth and impact, particularly on solid coloured worksurfaces.

MATERIAL TECHNOLOGY

N-BOOST TECHNOLOGY

Your worksurface's DNA has been boosted to make it easier than ever to maintain and clean. This performance trait offers outstanding resistance to stains, extraordinary shine and helps lock in colour intensity.

FULL STAVE CONSTRUCTION

Applicable to our timber worksurfaces where the wood runs the full length to avoid any visible joints.

END GRAIN

Popular on chopping boards and butcher's blocks, this is when the wood is cut across its growth rings, resulting in a striking, multi-layered surface full of variation.

FINGER STAVE CONSTRUCTION

A wooden treatment where the joints are visible, finger staving features short, thin staves of wood bonded together by glue.

HYBRIQ+

Silestone Hybriq+ by Cosentino ZERO CARBON hybrid mineral surfaces manufactured using 100% renewable energy, 98% recycled water & 20% minimum recycled glass, with the added bonus of reduced percentage of crystalline silica maximum 50%.

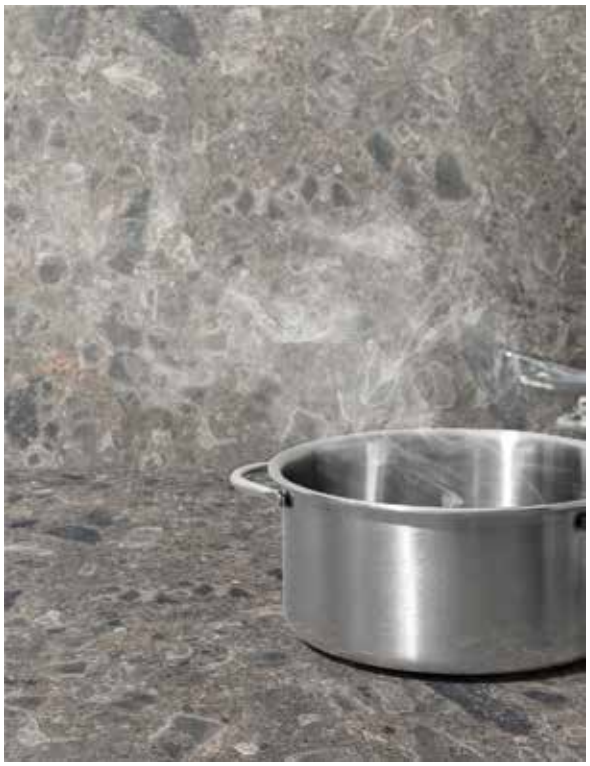

DEKTON GRIP

Dekton Grip offers a smooth finish similar to the standard version, enhanced with advanced treatment to ensure reliable slip-resistance.

MATERIAL TECHNOLOGY

DEKTON designed by COSENTINO

LUNDHS

HEAT PROOF

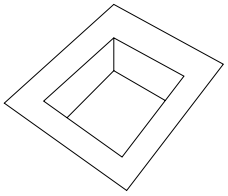

Dekton and Lundhs surfaces are highly heat-resistant, capable of withstanding extremely high temperatures. Fire and heat won't damage these surfaces, making them exceptionally durable and reliable for various applications.

OUTDOOR USE

Dekton and Lundhs worksurfaces are ideal for outdoor use. They offer exceptional resistance to high temperatures, stains, and impacts.
Additionally, they withstand external climatic factors such as frost, sun, hail, and wind.

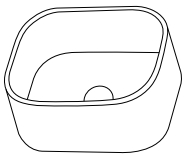

SINK STYLE

Spanning from classic ceramic, elegant undermounts, to striking down-stand designs, sinks offer a diverse range of styles, providing countless combinations to complement your ideal worksurface.

EXTRACTOR HOUSING

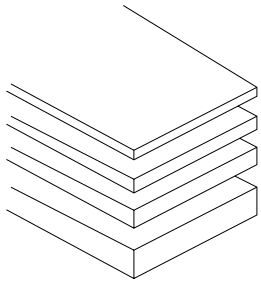

We have created a cladding option as a straightforward way to hide the extractor housing, creating a sleek and modern look instead.

Worksurface: Strata Calacatta Gold

THICKNESS STYLE

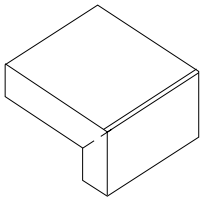

20mm or 30mm might be the go-to thickness for worksurfaces but these are just conversation starters. Where you choose to take your worksurface is entirely your choice...

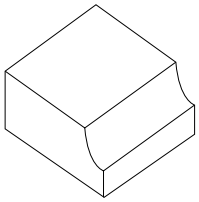

EDGE STYLE

It's the small details that truly set your kitchen apart. The choice of edge for your worksurface can profoundly influence the overall ambiance. Whether you prefer a classic curve or a sleek, modern straight edge, there are numerous styles to tailor your worksurface to match your kitchen's unique style and aesthetic.

SPECIALISTS FROM START TO FINISH

History and reputation

Materials, details and finishing touches alone do not make an everlasting worksurface. It takes a team of experts in their field to bring together all the elements and bind them into a masterpiece that you'll be able to love and use day in day out for a lifetime. Based here in the UK, we've been masters in worksurface design, making and fitting for decades. And it's because of our history and reputation that we've been able to build a material supply network from the world's most esteemed sources, to guarantee you a surface that's remarkably high quality in every regard.

AWARD-WINNING EXCELLENCE

BEST WORKSURFACE BRAND -BKU AWARDS 2025

We're proud to share that PWS Worksurfaces has been named Best Worksurface Brand at the BKU Awards 2025—a prestigious recognition voted for by professionals across the KBB industry.

PRECISION TEMPLATING

Your worksurface is designed to your exacting requirements, and that applies to its made-to-measure sizing too. One of our templating experts will visit your home to digitally map and measure your dimensions to promise millimetre perfection.

BESPOKE MANUFACTURING

When worksurfaces are authentically made, it's somewhat of an art – one we're proud to have honed and mastered. Every one of our worksurfaces is handmade to order with our sculptors pouring over every last detail that you've personally chosen.

COMMITMENT TO WORKFORCE SAFETY

We believe that engineered stone can and must be produced safely when the right measures are in place. That's why we fully support and strictly adhere to industry regulations, working in close collaboration with the Health and Safety Executive to not only meet but exceed the required standards wherever possible.

Our commitment to safety doesn't stop at our factory doors. It extends to every subcontractor and on-site installer we work with. We enforce clear, non-negotiable guidelines and require all subcontracted teams to formally agree to these safety protocols. Regular audits are carried out to ensure continuous compliance, accountability, and above all, protection for everyone involved.

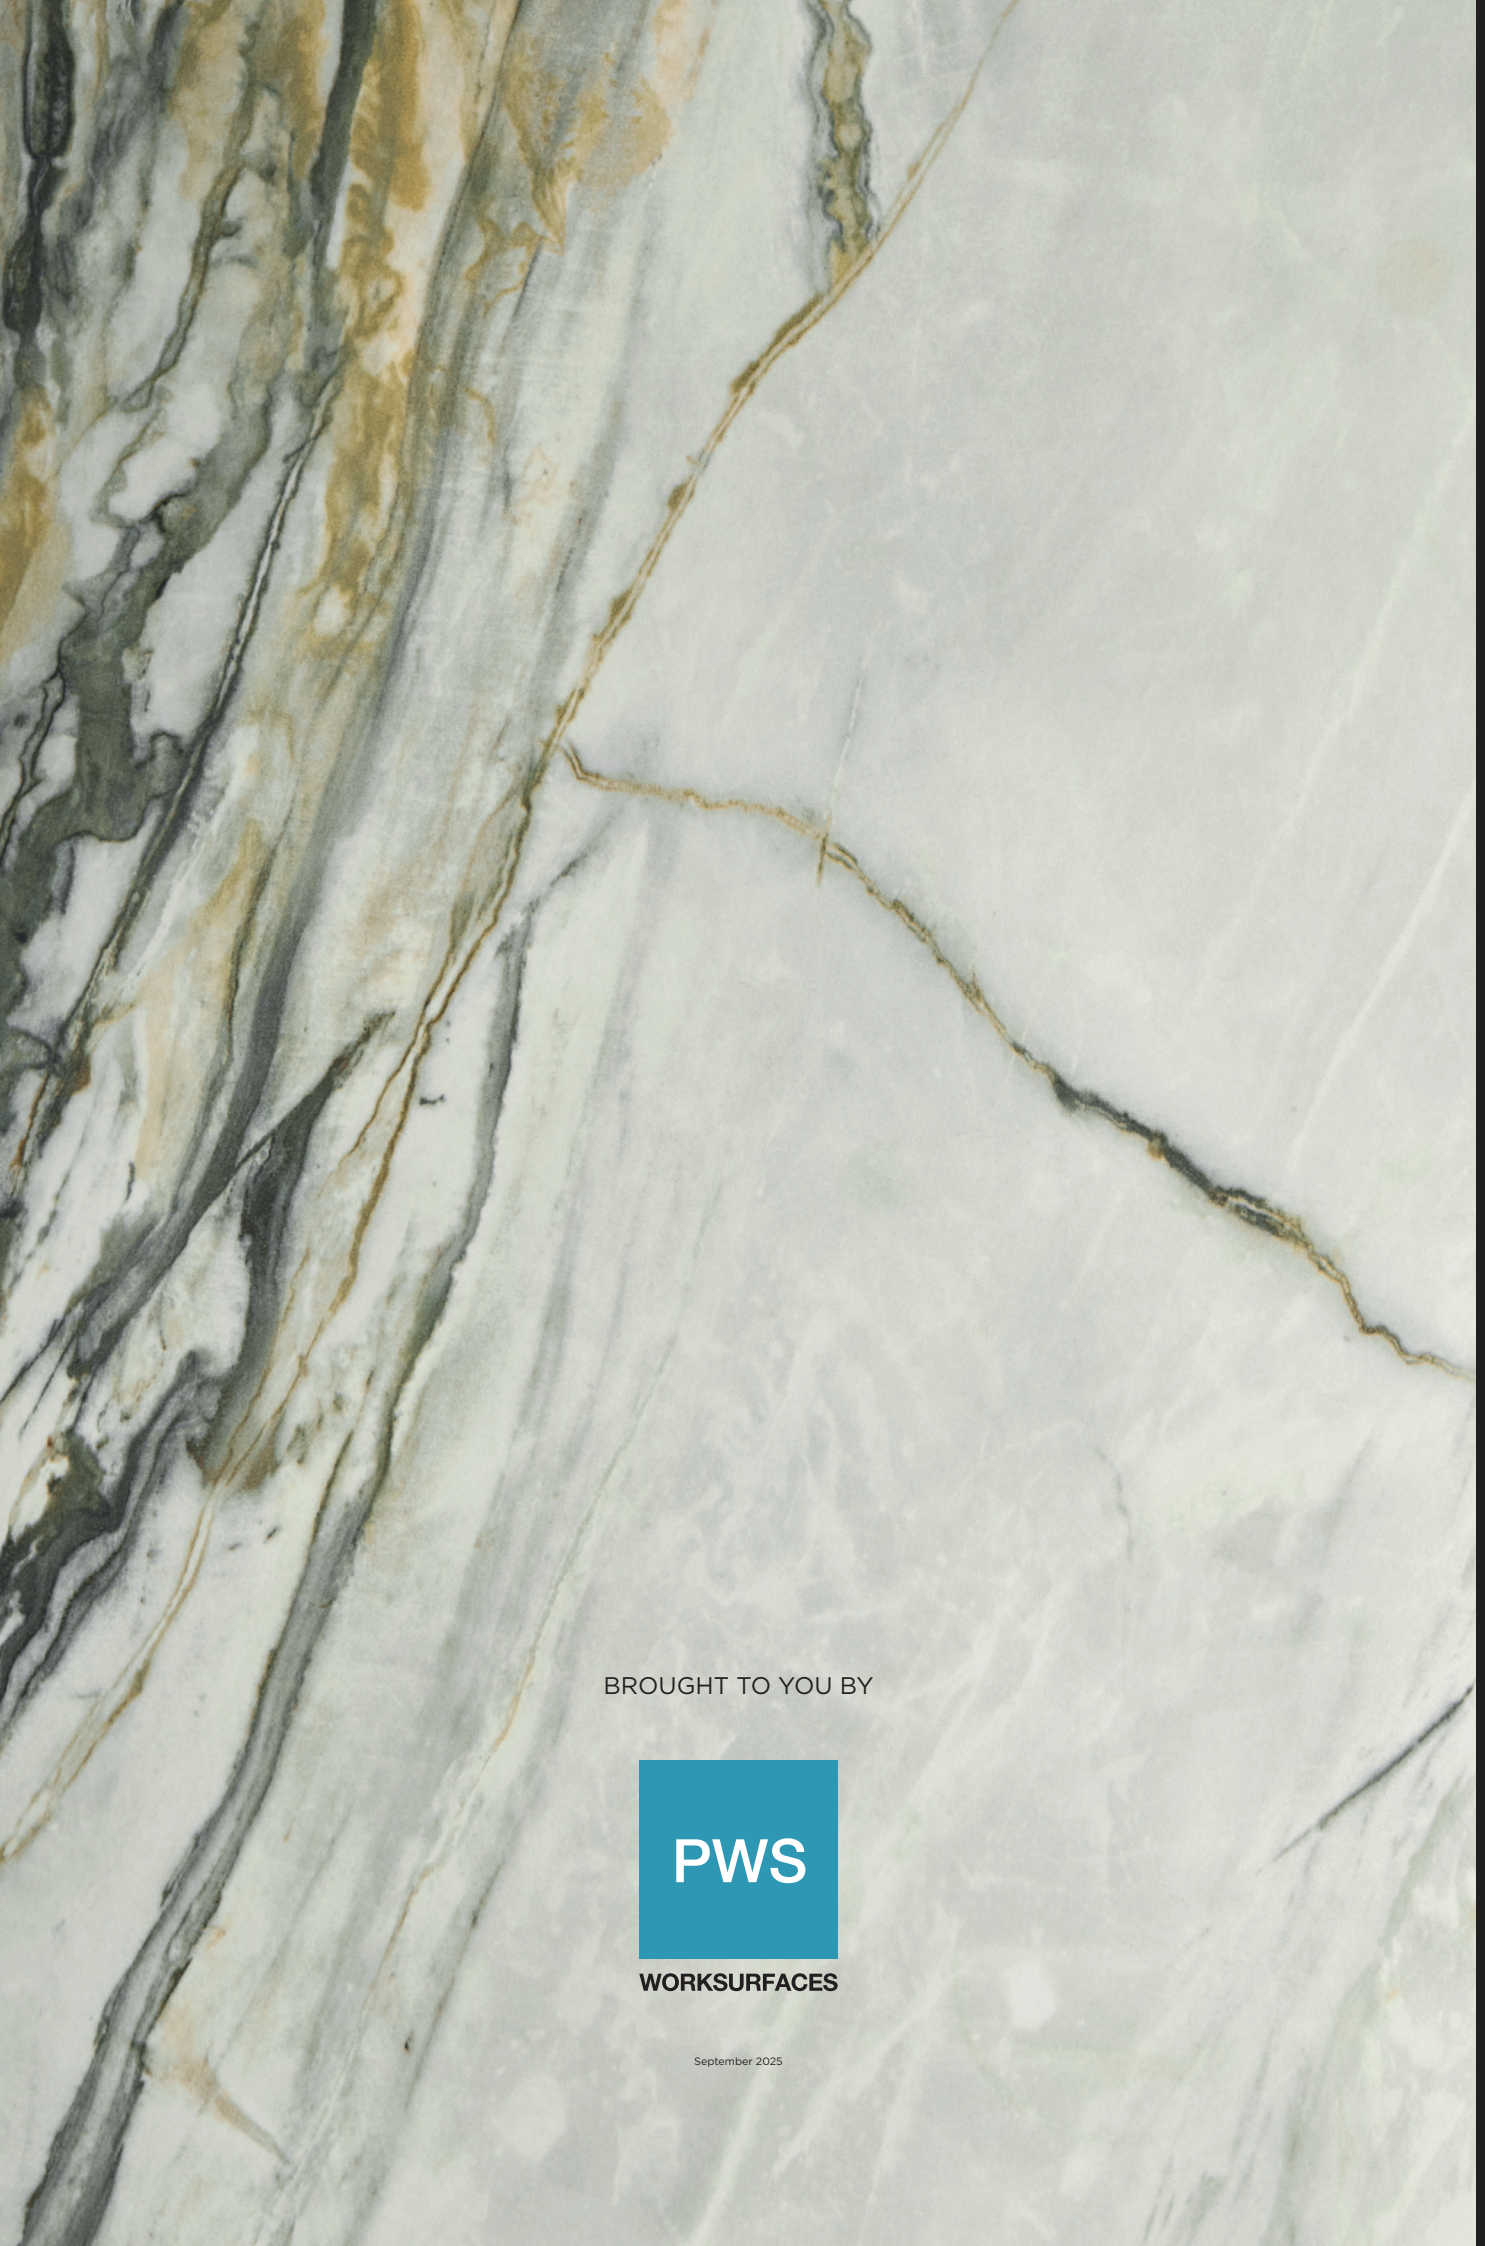

SPECIALIST INSTALLATION

Your worksurface will only ever be delivered and fitted by one of our accredited installers. They'll also guide you on how to clean and care for it before leaving your home.

PREMIUM AFTERCARE

From the moment your worksurface is installed, we guarantee you, as the registered owner, for manufacturing defects up to a decade. This way, you know that our care and support is always at your side, just as your worksurface will be for year, after year, after year.
